

Napkin Drawings – Visualizations – 5/16/2022

Jakob shared visualization napkin drawings folder with Diamond Dogs (Jeannine and Jared)

Feedback: Discussion on proper axis usage, research determined that actual cost is best on x-axis, no changes needed

Feedback: Liked usage of slicer here, question about axis (add axis ticks later)

Feedback: Liked scatterplot choice, no changes needed

Estimates, Actual Costs, and ML predictions of Medical Procedures

Feedback: differentiating by color in final visualization

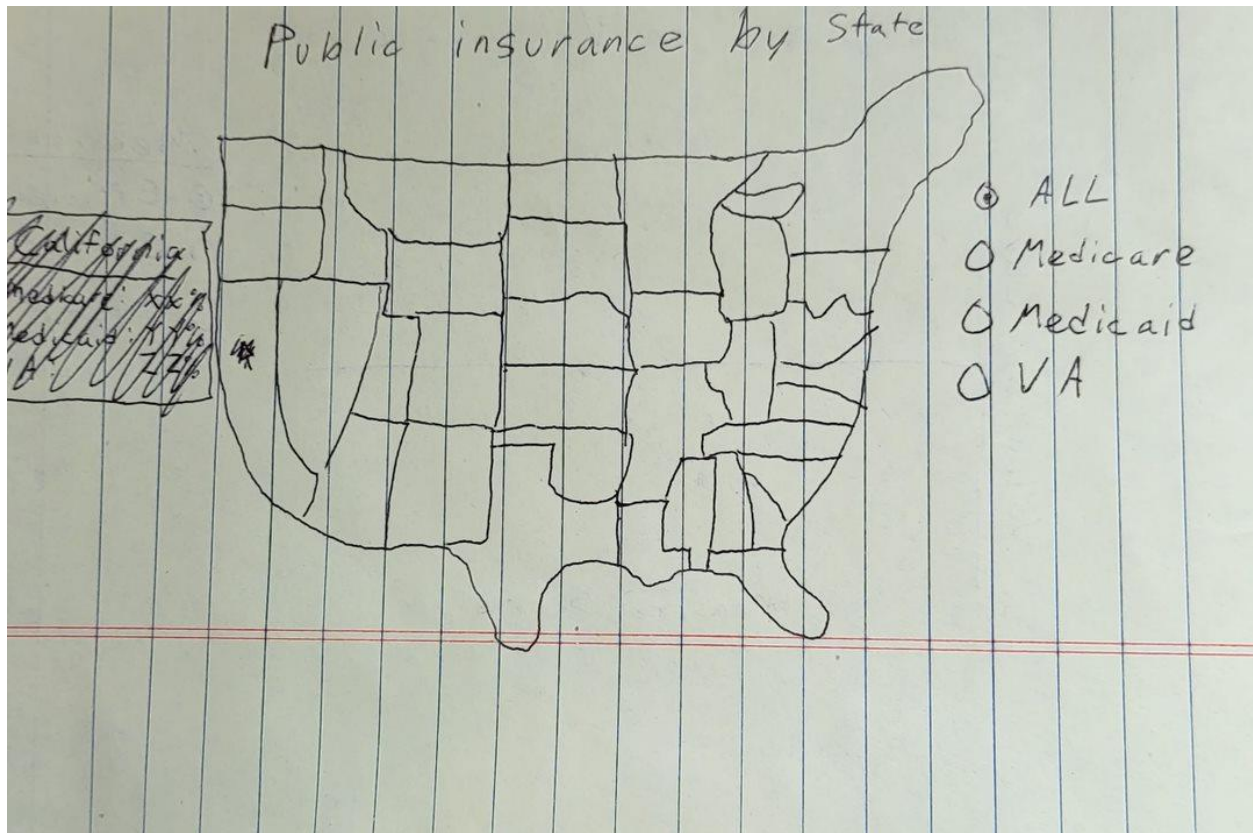

Procedure Cost Predictor

High Estimate: \$

Low Estimate: \$

Predicted Actual Cost: \$ #####

Feedback: liked ability for user input, discussed if usage would be best on customer-end and/or provider-end, recommendation was for provider-end but sparked interesting considerations

Feedback: clarify what values will be represented (population counts, percentages, etc.)

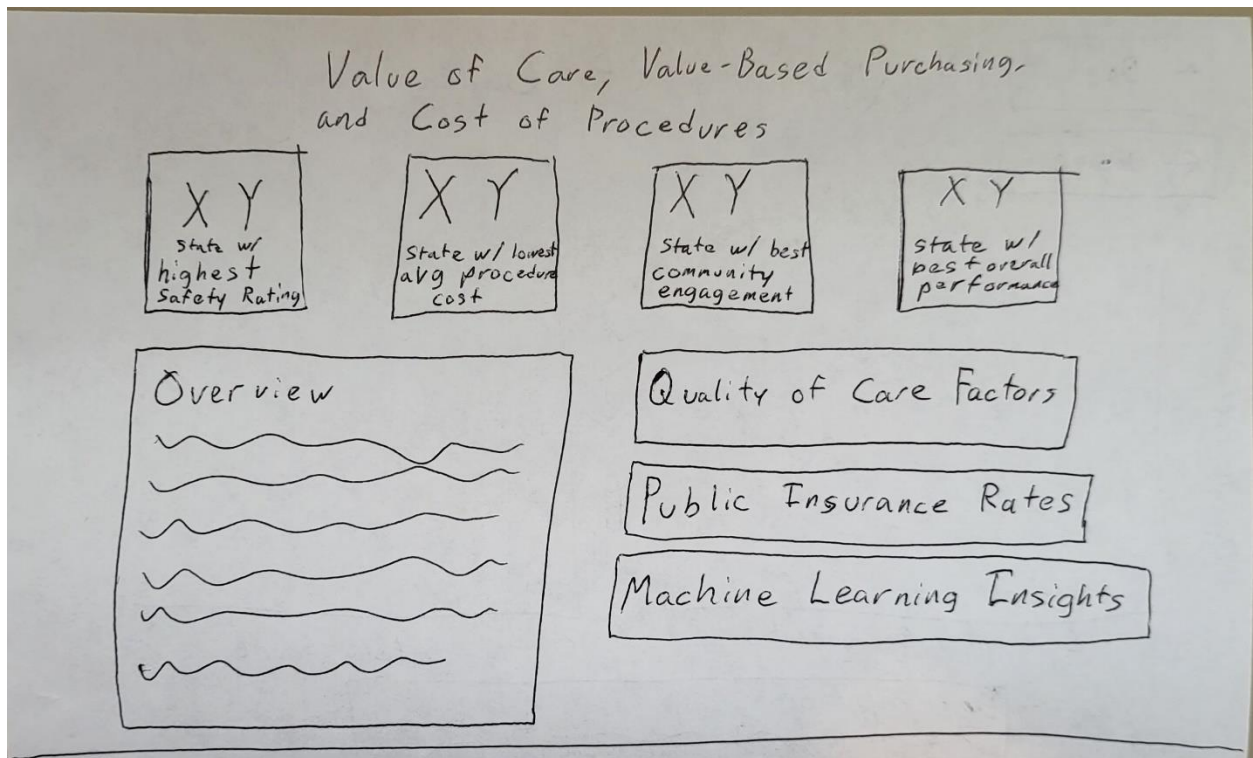

Feedback: clarify what is meant by "outcome"

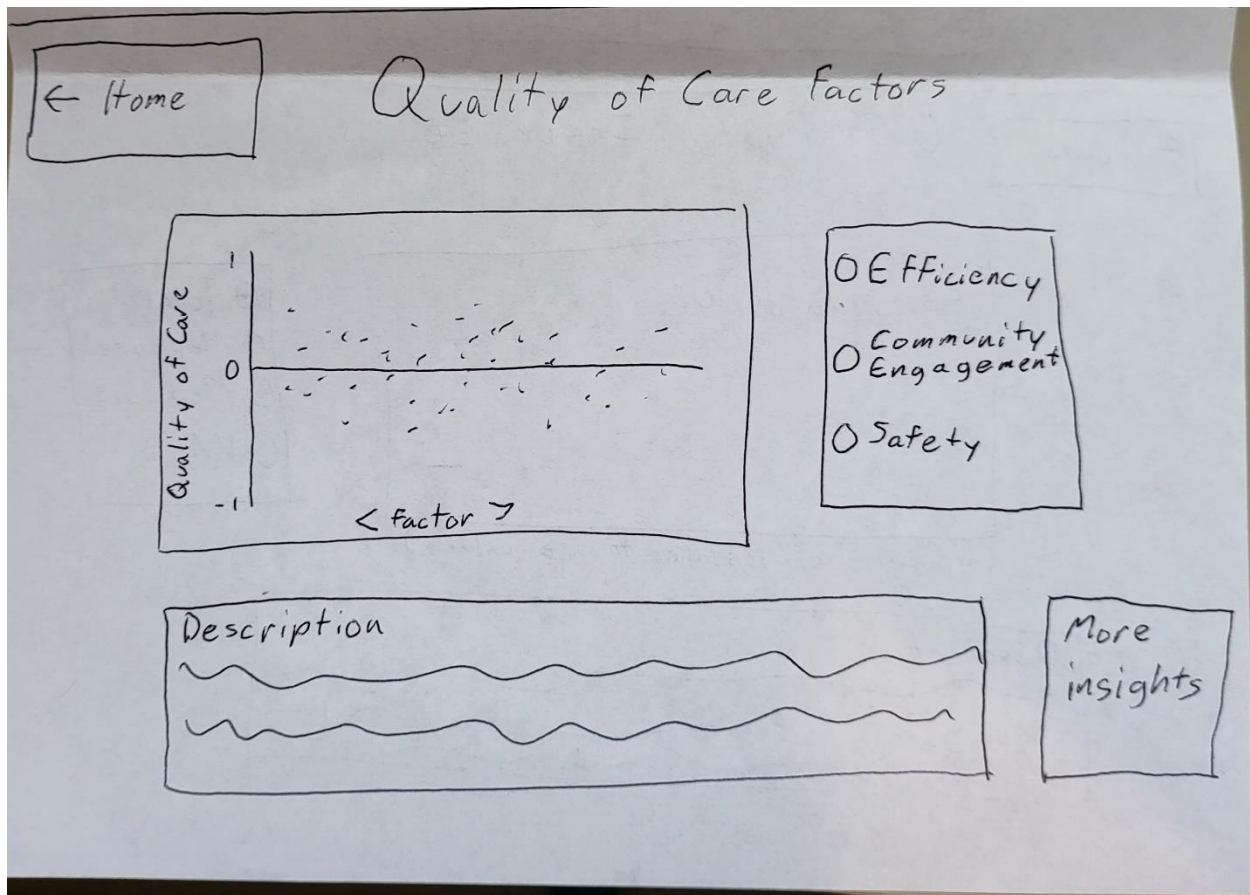

Overall Feedback: complete napkin drawings with legal pad paper lines going horizontally for readability

Napkin drawings – dashboard – 5/19/2022

Shared drawings with same group as above.

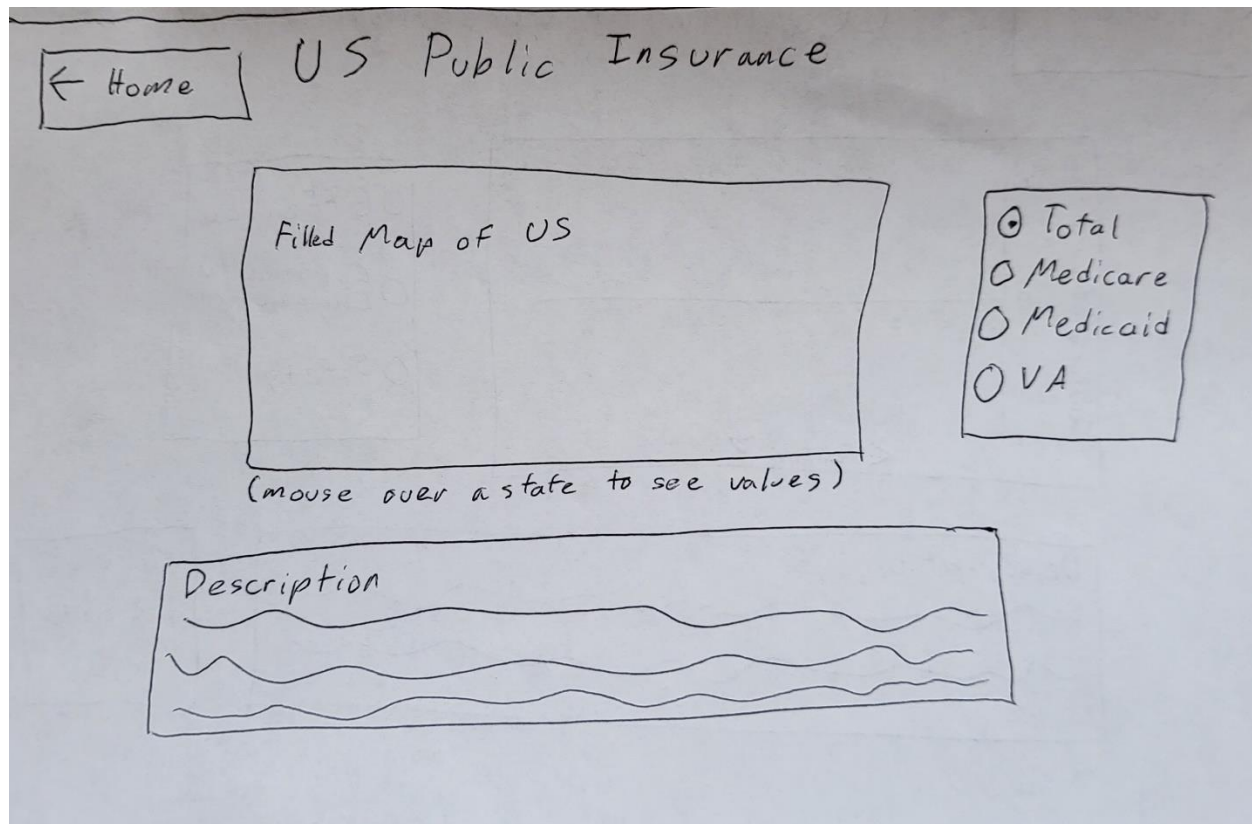

Feedback: good organization, simple formatting. Be wary of being over-ambitious with links and interactivity.

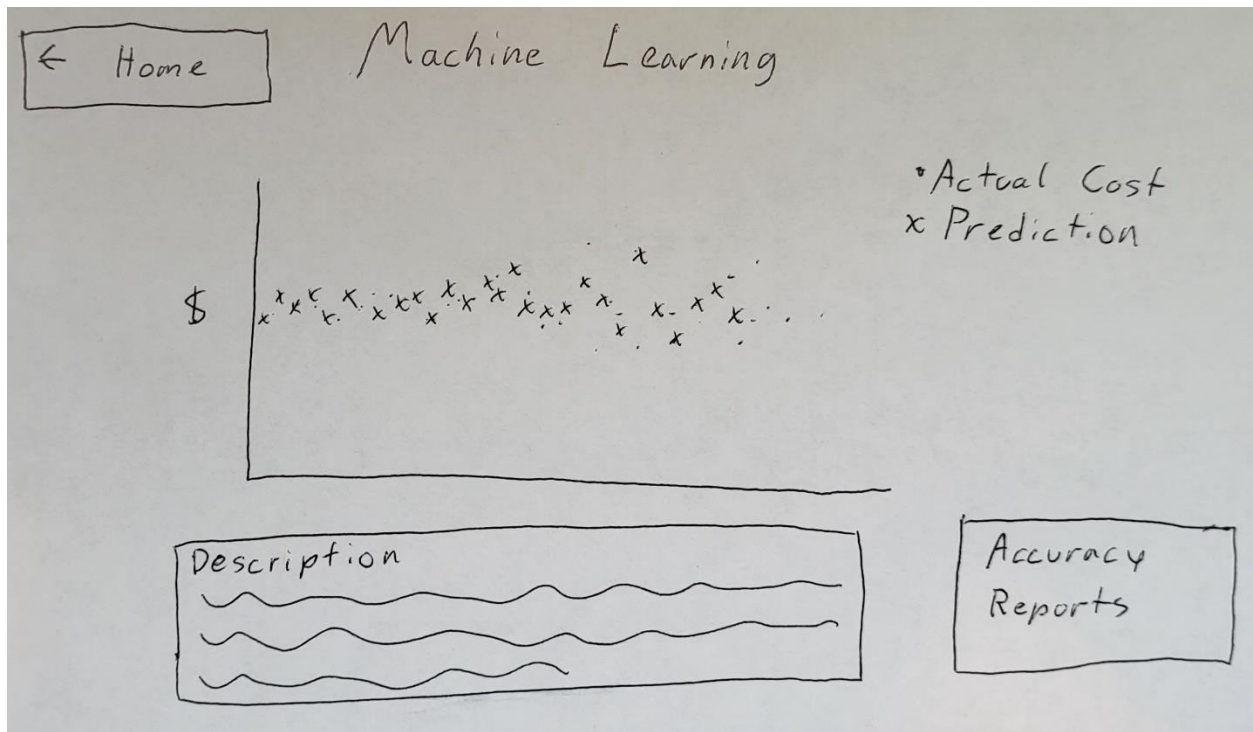

Feedback: As above; clean layout, clear navigation. No issues.

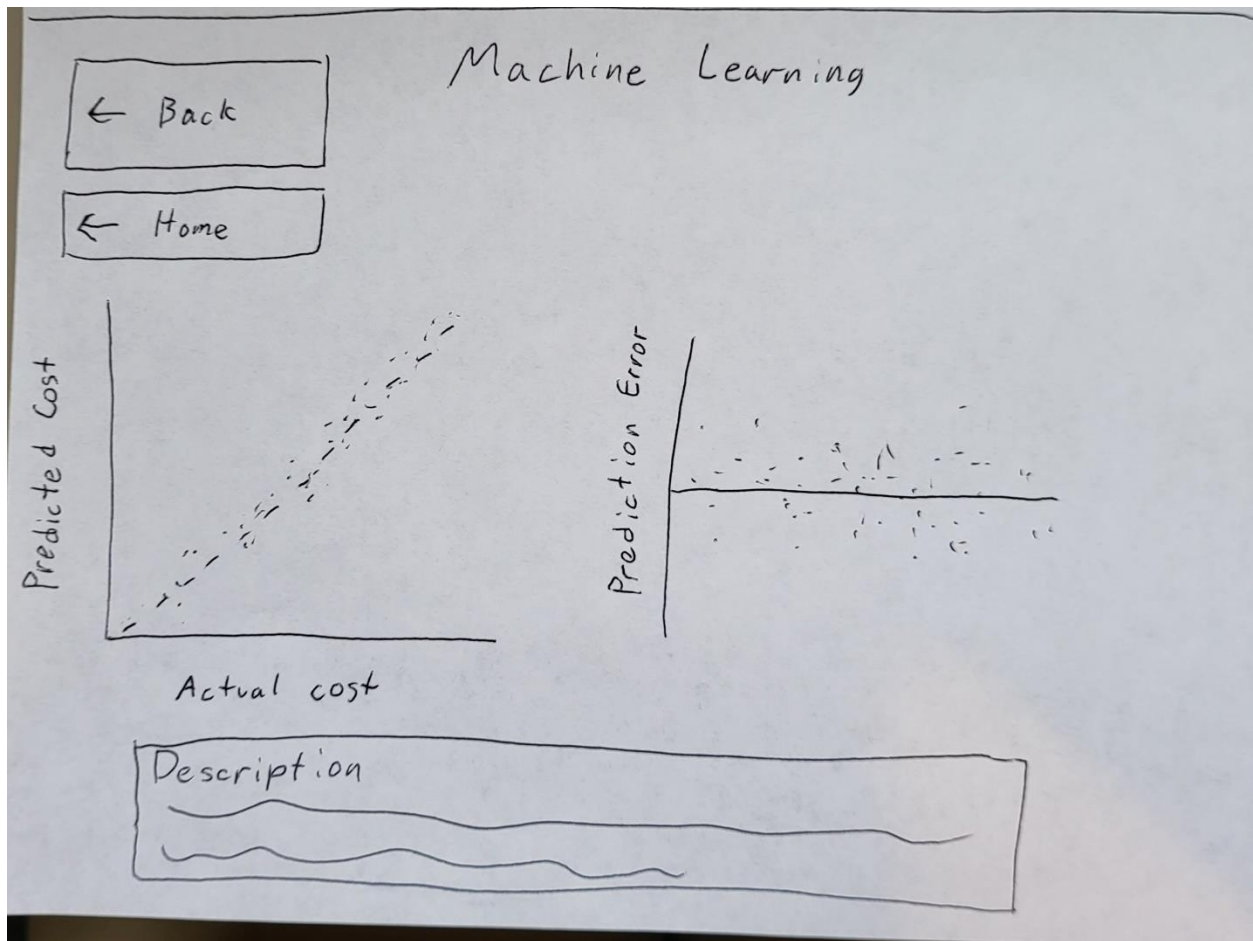

Feedback: Good extra information. No change needed.

Feedback: Good use of slicer; no changes needed.

Feedback: Make sure to make the actual cost and prediction points distinguished from each other. Otherwise, nothing to change.

Feedback: No comment; nothing to change.

Overall: looks very good, very user-friendly. Presents a large amount of information in a measured way to prevent the user from being overwhelmed.
